

NTM 64/16 Wemyss Bay Ferry Terminal Pier Cathodic Protection Survey/Testing

Categories : [Notice to Mariners](#)

Date : 13th September 2016

Mariners are advised that contractor MCPS Limited will be conducting surveys/testing of the cathodic protection system fitted to the pier structure at Wemyss Bay Ferry Terminal, on Thursday 15 September 2016.

The survey/testing is planned to be undertaken from a small workboat.

The Inspection Team Supervisor will monitor VHF Channel 31 and will liaise with the Port Manager and Master of the CalMac Ferry to ensure there is no disruption to scheduled ferry services. If communication cannot be established then the work boat must stand clear of the pier while the ferry is in port.

All vessels navigating in the vicinity of Wemyss Bay Ferry Terminal are requested to proceed with caution and regulate their speed to minimise the effects of wash accordingly.

Further details can be obtained using the contact details below.
