

CORONAVIRUS UPDATE

Categories : [Press](#)

Date : 18th March 2020

Following revised guidance from the Scottish and UK governments this week, we have asked our employees to work from home to help limit the spread and impact of the virus.

All our employees are well set-up to work remotely and you should experience the same level of service as usual. We will have a skeleton staff working in the office to answer phone lines. However, it would be really helpful if you contact directly (by mobile phone and email) the individuals in our team that you normally work with.

While we have had to reschedule a small number of community meetings, the majority of our work continues as normal and our team remains busy on managing various harbour and ferry projects.

If there is a major change to our arrangements, we will provide an update through our website and social media channels.
